

# Why draft a will?

**1**

A will creates piece of mind by ensuring that you decide how your estate will be distributed.

**2**

You decide who your children's guardians will be and you can make provision for their inheritance to be administered by persons you trust.

**3**

You can plan your financial estate and thereby minimize estate duty, administration costs and attorney's fees.

**4**

You decide who will wind up the affairs of your estate.

**5**

You can disinherit individuals who would otherwise stand to inherit. Likewise, you can make donations to persons of your choosing.

**6**

A will can help prevent disputes among family members.

**7**

Death is a certainty and tomorrow is not promised so you must have a will which deals with your current circumstances. If you have a Will- review it! If you do not have one - why procrastinate?
